Fourth Grade Flyer

Ancient China

For the next two weeks, we'll take a trip back in time to ancient China. We're going to learn about many early dynasties and all of the important inventions that the Chinese first made: paper, silk, compasses, fireworks, noodles, and paper money. Students will have a Great Wall project to complete this week. Check for the directions in today's folder.

I would like to have a Chinese feast next Thursday for lunch. We could use your help with the food. You may make or buy food to send. You will receive a volunteer hour for each dish you send. Please let me know if you can send any food by marking the form below. Remember that this is a Chinese feast, so please don't send chicken nuggets and French fries! If you are not sending any food, please prepare a lunch for your child to eat that day.

Miscellaneous...

- o Thank you to the Jaramillo and Poche families for sending in more snacks.
- o A good strategy for helping students read who are struggling with homework texts is to chorally read, which means you both read the book together, at the same time, at your pace.
- o The students have lost 3 *Get Ready for Gabi!* books. If you find one at your house, please send it back. In the future, I assign students numbered books, and any student who does not return a book will need to pay for the book to be replaced.

.....

For the Chinese feast, I plan on sending _____.

Parent's name _____
